

Matteo Pagin

PhD student at the University of Padova, Telecommunications Engineer

E-mail | Google Scholar | LinkedIn

Summary

TODO: update. Information Engineering PhD student with a strong analytical background in various emerging technologies, such as Machine Learning, Big Data and Information Security. Particularly passionate about evolving such technologies forward and facing new challenges.

Education

PhD in Information Engineering, University of Padova, Italy. | Oct 2021 - Ongoing

Research focus on the design and evaluation of protocols for next-generation cellular networks (5G and beyond). Collaborated with several research institutions and companies, including Northeastern University, CTTC, NYU, TU Darmstadt, Orange, Viasat and Huawei Milan.

Visiting researcher, WiNES Lab., Northeastern University, Boston, MA. | Mar 2023 - Sep 2023

Worked on designing and implementing O-RAN-like interfaces for 802.11x devices and the development of an SDR-based testing platform for RIC-aided multi-RAT network deployments.

Postgraduate researcher, SIGNET Lab., University of Padova, Italy. | Nov 2020 - Sep 2021

Worked on a joint project with Orange which targeted the identification of promising solutions for NR-Light, and their end-to-end evaluation via system-level simulations. General development of the ns-3 mmWave module.

MSc. in ICT, University of Padova, Italy. | Oct 2018 - Ongoing

Curricula Cybersystems. Final grade: 110 Cum Laude.

BSc. in Information Engineering, University of Padova, Italy. | 2015 - Sept 2018

High school diploma, "Liceo Scientifico Albert Einstein", Piove di Sacco, Italy. | 2010 - 2015

Work Experience

Master and bachelor thesis supervision, University of Padova. | 2020 - Ongoing

Supervised thesis focusing on NTN channel modeling, simulating 5G NR beam management, and analyzing the performance of various TCP variants over high BDP channels.

Google Summer of Code 2022 with the ns-3 organization. | May 2022 - Sep 2022

Worked on the design and the development of a performance-oriented MIMO channel model for ns-3, and on the optimization of the ns-3 channel model-related algebra routines.

"Studente 200 ore", University of Padova. | 2017, 2018

Worked as an assistant in various University's facilities.

High school students tutoring. | 2015 - 2019

Private tutoring for high school students on scientific subjects (Math, Physics).

Awards

Best Workshop Paper Award. | Mar 2023

Awarding institution: 2023 IEEE WCNC Conference

Mario Gerla Best Paper Award. | Jun 2020

Awarding institution: 2020 IEEE Mediterranean Communication and Computer Networking Conference

Skills

TODO: update. I am an hard-working, extremely curious person who is always ready and willing to learn new things. I am also collaborative and capable to work well in a team of people, as of being responsible of my own eventual mistakes: I developed these perks during multiple University's team projects and by being a Scout for 5 years.

Languages: Italian - Mother tongue, English - B2

Programming languages: Python (NumPy, Matplotlib, Seaborn, SciPy), C++, C, Java, MATLAB

Frontend technologies: JavaScript, HTML, CSS

Others: ns-3, O-RAN, Git, LaTeX, Docker, Bash, Blender, Adobe Photoshop

Driving license: B
